WORK EXPERIENCE

Android Engineer

Backbase Pvt Ltd, Hyderabad Dec 2022 – Present

SNB, BDO, CIH, CBC

- Built custom banking applications on top of Backbase SaaS banking platform.
- Developed reusable banking workflows, modular Android architecture, and enterprise-grade mobile solutions.
- Implemented API integrations, authentication flows, and scalable banking user experiences.
- Collaborated with distributed teams to maintain consistency and reliability across multiple banking applications.

MAR

- Built a custom banking application using Jetpack Compose on top of Backbase SaaS banking platform.
- Developed modern UI components using Compose and reusable component-based architecture.
- Actively reviewed pull requests of teammates and was an active participant in architectural decisions.
- Collaborated on enterprise banking workflows and mobile application customization.

Senior Software Engineer – Android

MakeMyTrip, Bengaluru Mar 2022 – Nov 2022

Contributed to the consumer application of one of India's largest travel platforms.

Key Contributions

- Enhanced the home screen experience of a high-traffic consumer application.
- Worked within a large-scale modularized codebase with reusable shared components.
- Collaborated closely with design and engineering teams to maintain Android UX consistency and performance standards.
- Improved UI responsiveness of critical user flows in a high-traffic consumer application.

Senior Software Engineer

Flatworld Solutions Sep 2021-Mar 2022

Toktiv

- Developed a VoIP communication application supporting calls, conference calls, and SMS functionality.
- Implemented real-time communication workflows, user interaction handling, and feature reliability.
- Built stable communication experiences and improved app usability.

Senior Software Engineer – Android

Apptmyz Technologies Pvt Ltd, Hyderabad Dec 2015 – Sep 2021

Led Android development for multiple applications across logistics, utility, travel, and workflow domains.

PUD & Vmiles

- Developed logistics and workflow applications involving real-time location sharing and tracking.
- Implemented Bluetooth printing for labels, receipts, and field operation workflows.
- Led complex workflow management features involving device integrations and reliability.
- Developed scalable Android features using Kotlin and modern Android practices.

RTMS & Spoton

- Developed business workflow applications with CRUD operations, reporting dashboards, and management modules.
- Implemented data-heavy screens, report generation workflows, and API-driven business processes.
- Enhanced maintainability and usability of enterprise operational applications.

Electricity Billing App – Chattisgarh

- Developed a utility billing application involving heavy mathematical calculations and bill generation workflows.
- Implemented printing functionality for electricity bills and utility processes.
- Focused on billing accuracy, calculation reliability, and stable workflow execution for field operations.

Skills

Languages: Kotlin, Java

Architecture: MVVM, MVI, Clean Architecture

Android: Jetpack Compose, Android Jetpack components, Material Design

Concurrency & Networking: Coroutines, Flow, Retrofit, REST APIs

Tools: Hilt, Koin, JUnit, Git, Gradle, Android Studio, Jira

AI Tools: GitHub Copilot, Cursor

LEADERSHIP & CONTRIBUTIONS

- Mentored junior developers and contributed to onboarding, code reviews, and engineering best practices.
- Participated in hiring and technical evaluations.
- Technical writer focused on Android development and software engineering concepts.
- Club Secretary – Toastmasters International (Recognized for leadership contributions).

EDUCATION

B.Tech – JNTU 2016 80%
